

25 year Linear Power Guarantee

Performance assured every year

siliken
innovation experience

Siliken is offering its customers a 25-year linear power guarantee. Purchasing Siliken modules is nothing short of a safe bet, thanks to both their efficiency and their safety. Siliken's linear guarantee ensures maximum power of its modules for 25 years. Such a guarantee is only provided by a very small number of manufacturing companies worldwide.

What is the linear guarantee?

The 25-year linear power guarantee is a reflection of the level of reliability of Siliken photovoltaic modules; always with the clear objective of offering continuous improvement to the service it offers its customers.

This guarantee ensures a 97% performance level for the module during the first year. From the second year through to the 25th year the performance of the module is guaranteed with a degradation level of less than or equal to 0.7% per year.

Close to our customers

The linear guarantee for Siliken modules, which is provided at no additional cost and which is immediately applicable, has been implemented in accordance with the company's aim of offering its customers the best possible service and results from the company's in-depth knowledge of its products.

All photovoltaic modules suffer a certain degree of degradation that directly affects their power. With this linear guarantee, customers can check the performance of their modules every year and ask for a replacement if they do not meet the minimum requirements.

Siliken Goes Further

Siliken photovoltaic modules can be installed on both independent systems and grid connected systems, and are suitable for use on solar farms, industrial rooftops, for architectural integration or residential installations. They cover power ranges of up to 310 Wp with efficiencies of up to 16% and have a power tolerance of +3/0%.

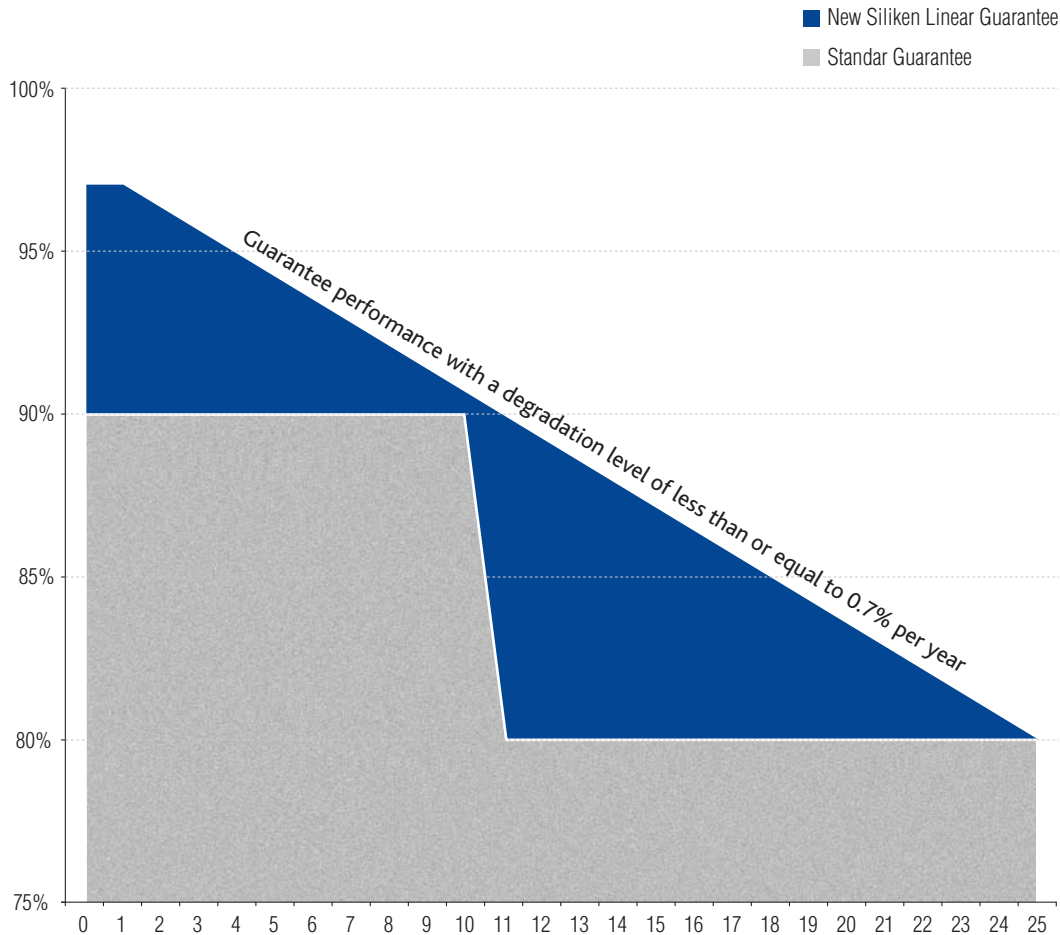

Furthermore, Siliken modules are SGS certified in accordance with ISO 9001:2008 and ISO 14001:2004 and have obtained product certifications under Standards EN (IEC) 61215:2005, EN (IEC) 61730:2007 Safety Class A and EN (IEC) 61701:1999 Salt Mist Corrosion Testing from TÜV Rheinland and under Standard UL 1703 from Underwriters Laboratories and Intertek ETL for applications around the world. Siliken has also recently been issued with the Microgeneration Certification Scheme (MCS) seal of approval, making its photovoltaic modules suitable for all types of photovoltaic installation in the United Kingdom.

The Siliken module is the number one module in 2010; it generates 5.9% more power than the average value of all the modules studied and 12.4% more than the minimum value recorded.

The following charts show the improvements provided by the Siliken linear guarantee

Year	Standar Guarantee	Nwe Siliken Linear Guarantee
0	90%	97%
1	90,0%	97,0%
2	90,0%	96,3%
3	90,0%	95,6%
4	90,0%	94,9%
5	90,0%	94,2%
6	90,0%	93,5%
7	90,0%	92,8%
8	90,0%	92,1%
9	90,0%	91,4%
10	90,0%	90,7%
11	80,0%	90,0%
12	80,0%	89,3%
13	80,0%	88,6%
14	80,0%	87,9%
15	80,0%	87,2%
16	80,0%	86,5%
17	80,0%	85,8%
18	80,0%	85,1%
19	80,0%	84,4%
20	80,0%	83,7%
21	80,0%	83,0%
22	80,0%	82,3%
23	80,0%	81,6%
24	80,0%	80,9%
25	80,0%	80,2%
